Self-Energy Bubble Regression

Package-level standalone self-energy bubbles. These examples use the public `\BubbleCorr` API, not raw mockup drawing.

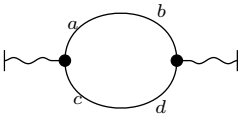

`clean default`

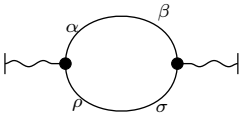

`momenta`

`endpoint indices`

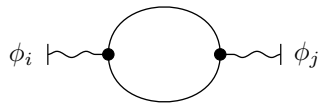

`flat endpoint shorthand`

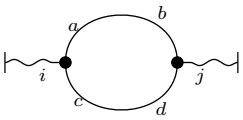

Outer Labels And Vertex-Side Indices

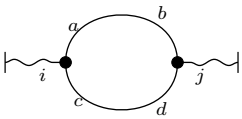

explicit outer labels

external vertex-side indices

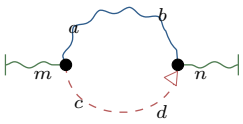

three index labels per vertex

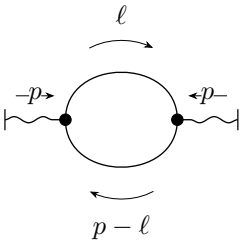

Styles And Momentum Directions

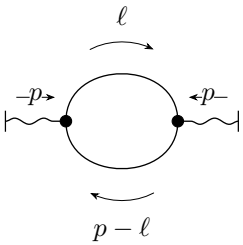

styled internal slots

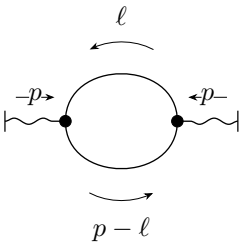

reversed lower loop

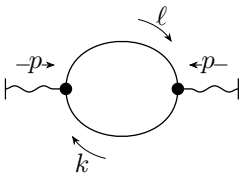

clockwise rotation key

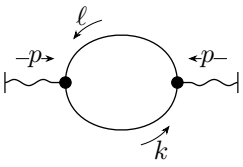

counterclockwise rotation key

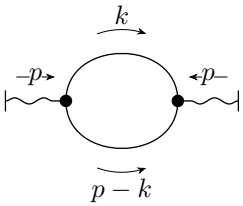

vertex split curve-aligned

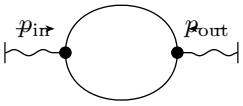

vertex split offset tuning

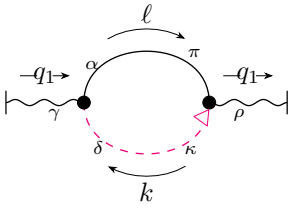

shorter arrows farther out

external momentum labels

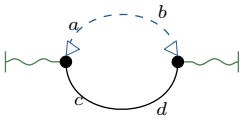

compact thesis-style bubble

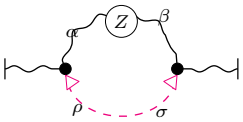

Internal Line Key Variations

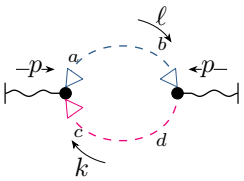

proca upper internal

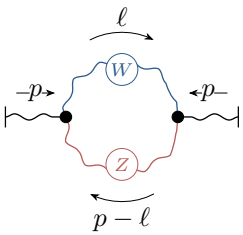

black circ ewboson and pink proca

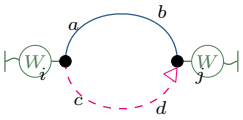

curved marker tangent stress

two circ ewbosons

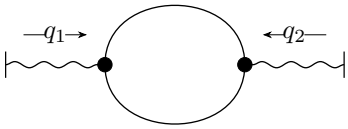

external key separated

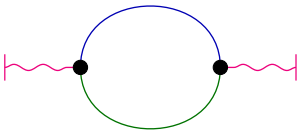

Endcap Sanity Checks

`default cap placement`

`colored caps`

`alias smoke check`
