External t-tree seagulls: four placements

One quartic insertion vertex and one self-loop. No momentum, caps or circles.

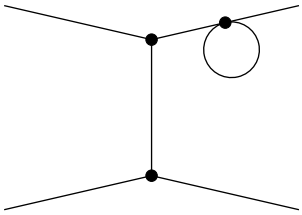

Slot 1: upper left

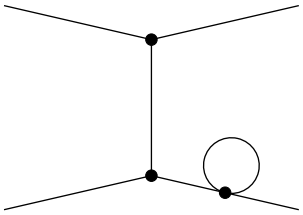

Slot 2: lower left

Slot 3: upper right

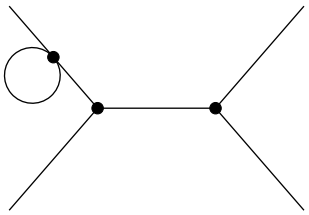

Slot 4: lower right

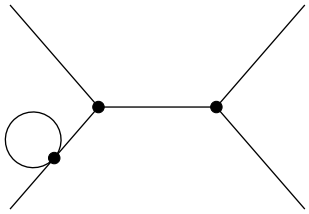

External s-tree seagulls: four placements

One quartic insertion vertex and one self-loop. No momentum, caps or circles.

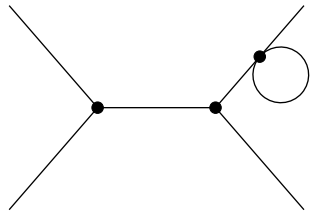

Slot 1: upper left

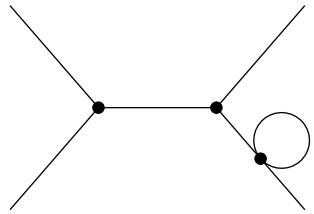

Slot 2: lower left

Slot 3: upper right

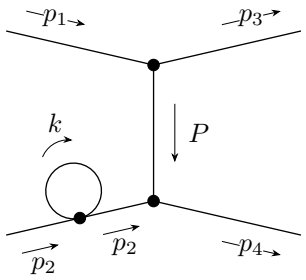

Slot 4: lower right

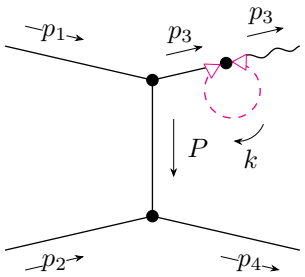

Momentum labels and mixed lines

Host labels retain logical slot identity; loop labels face away from their arcs.

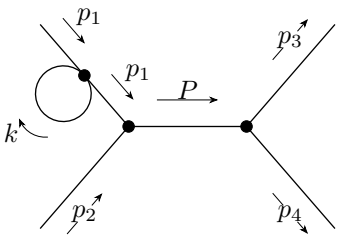

t-tree slot 2

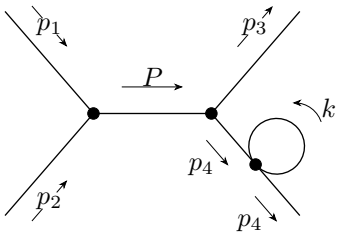

t-tree slot 3

s-tree slot 1

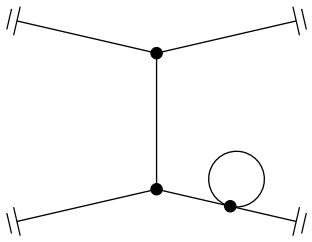

s-tree slot 4

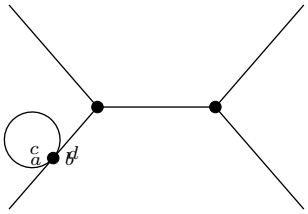

Separate controls and compatibility

Only the dedicated cap/index panels use those features. Index placement is deferred (D01).

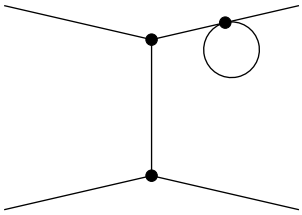

T slot 4: outer caps only

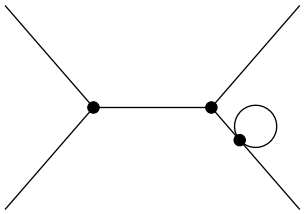

S slot 2: vertex index values

T slot 3: explicit top setting

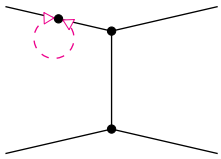

S slot 4: shifted and smaller

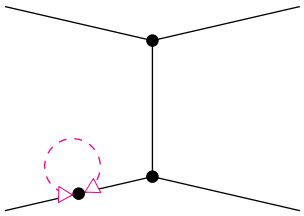

Proca endpoint contact: all eight placements

Only the self-loop carries pink endpoint markers. No momentum, caps or circles.

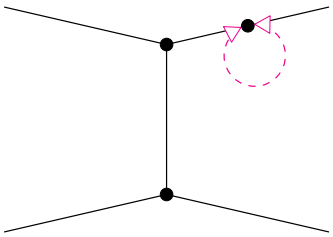

T slot 1; proca; scale 0.72

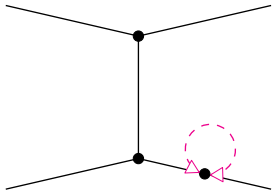

T slot 2; proca; scale 1

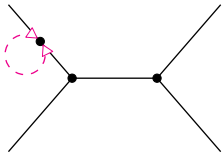

T slot 3; proca; scale 1.2

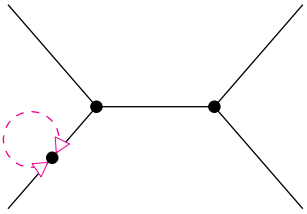

T slot 4; proca; scale 0.9

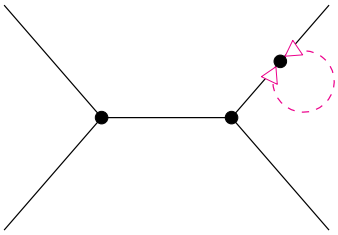

S slot 1; proca; scale 0.72

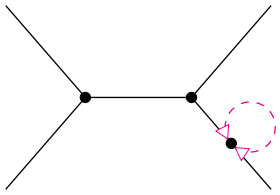

S slot 2; proca; scale 1

S slot 3; proca; scale 1.2

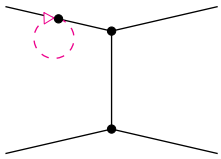

S slot 4; proca; scale 0.9

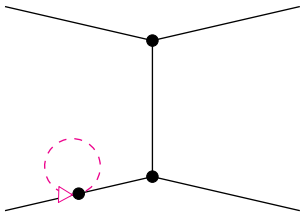

One-sided scalar markers: all eight placements

Only the self-loop carries pink endpoint markers. No momentum, caps or circles.

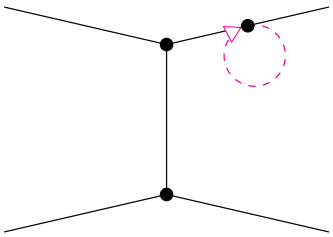

T slot 1; spolin; scale 0.72

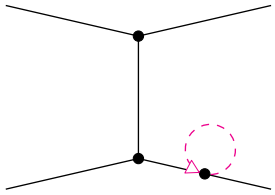

T slot 2; spolout; scale 1

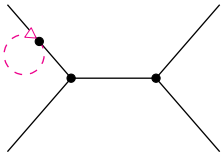

T slot 3; spolin; scale 1.2

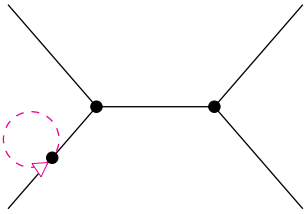

T slot 4; spolout; scale 0.9

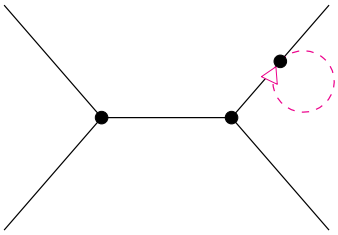

S slot 1; spolin; scale 0.72

S slot 2; spolout; scale 1

S slot 3; spolin; scale 1.2

S slot 4; spolout; scale 0.9
