Regular tree-attached triangles: all placements

Plain lines; four trivalent interaction vertices and one exchange bridge.

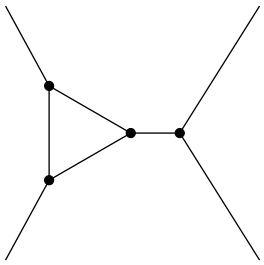

T bottom

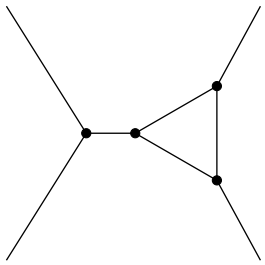

T top

S left

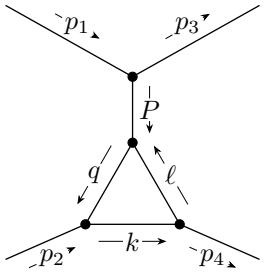

S right

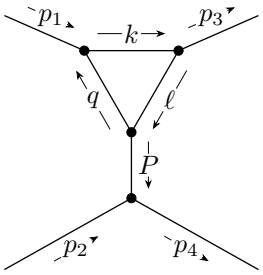

Independent momentum: all eight edges

Default gaps contain their labels; p1/p2 enter and p3/p4 leave.

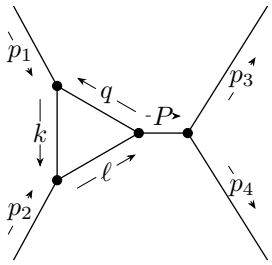

T bottom

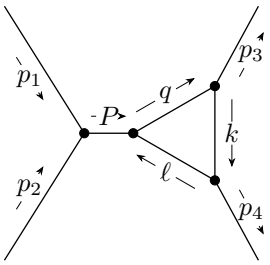

T top

S left

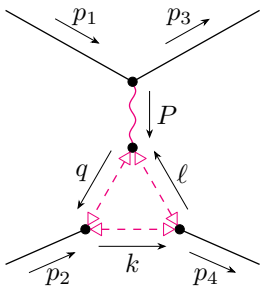

S right

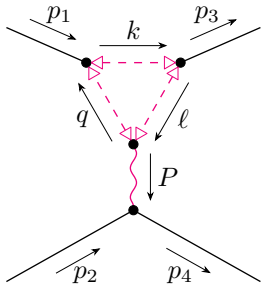

Continuous arrows and mixed propagators

Outside labels and pink loop edges; wavy exchange lines.

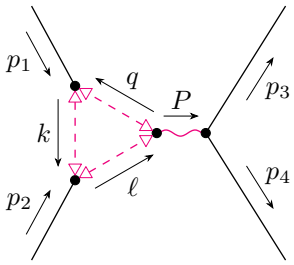

T bottom

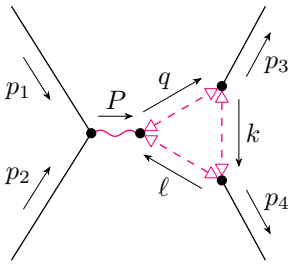

T top

S left

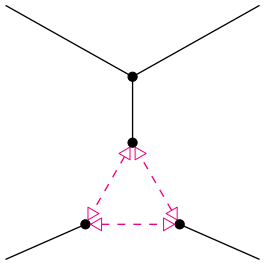

S right

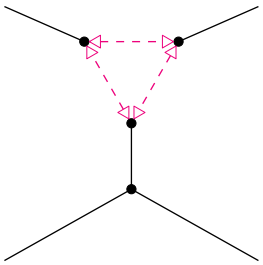

Proca endpoint contact: all placements

Only loop endpoint markers; no momenta, caps or circles.

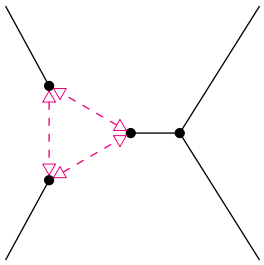

T bottom

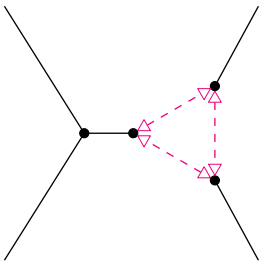

T top

S left

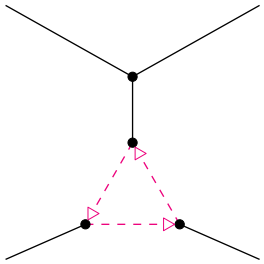

S right

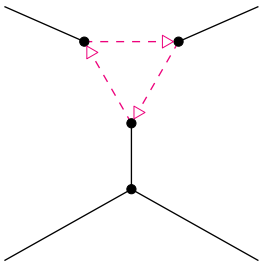

Scalar endpoint contact: all placements

Only loop endpoint markers; no momenta, caps or circles.

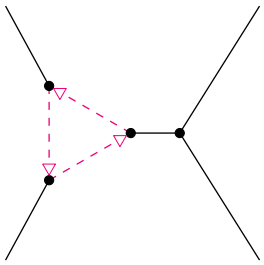

T bottom

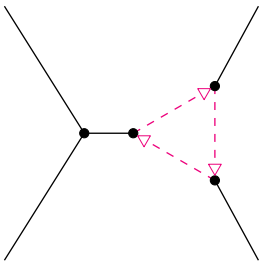

T top

S left

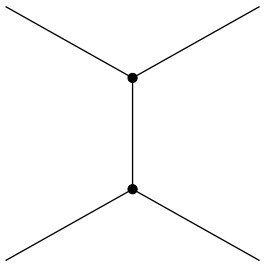

S right

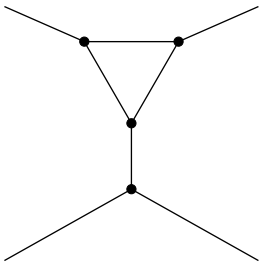

One shared outer frame: trees and boxes

All four external endpoints use $x, y = \pm 2.10$; only internal connectivity changes.

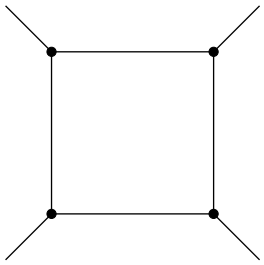

Ordinary T tree

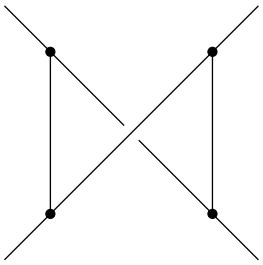

T triangle

Box

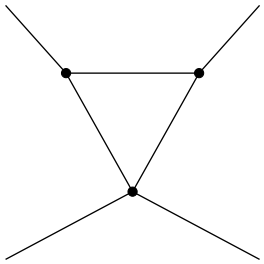

Crossed box

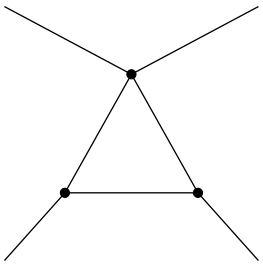

The same frame: triangle-contact orientations

The shared outer endpoints stay fixed in all four contact orientations.
