Internal crossed boxes: two layouts

Four trivalent interactions; the diagonal crossing is unconnected.

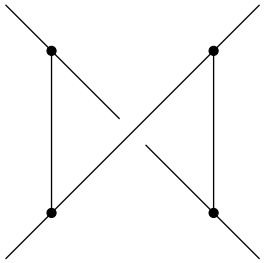

Left/right fixed: compatible default

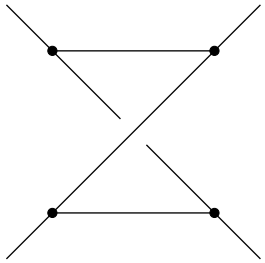

Top/bottom fixed: complementary crossing

Left/right: wider crossing gap

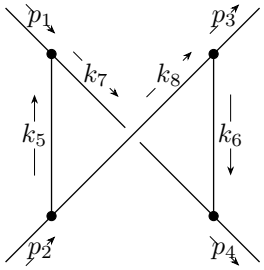

Top/bottom: wider crossing gap

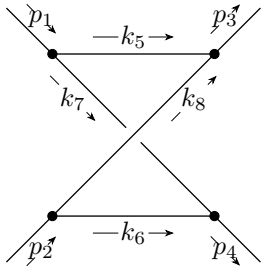

Independent internal momenta

No caps, species circles or indices. External p1/p2 enter; p3/p4 leave.

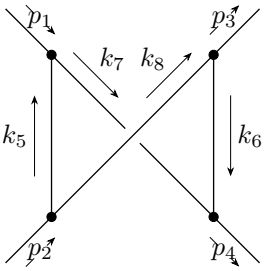

Left/right: measured label gaps

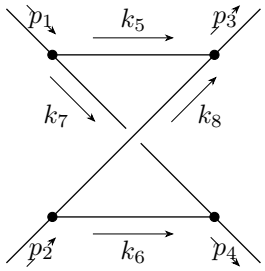

Top/bottom: measured label gaps

Left/right: continuous arrows

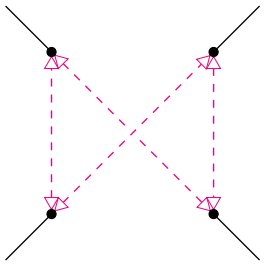

Top/bottom: continuous arrows

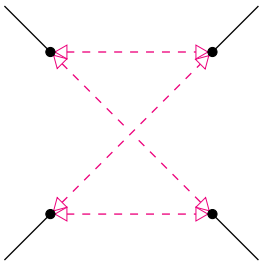

Endpoint markers: real vertices only

No caps, circles or momenta; none of the markers belong to the crossing gap.

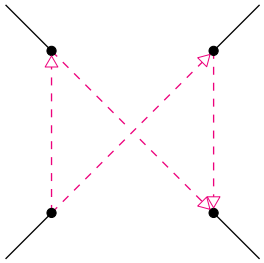

Left/right: Proca

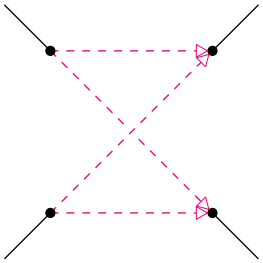

Top/bottom: Proca

Left/right: scalar polarization

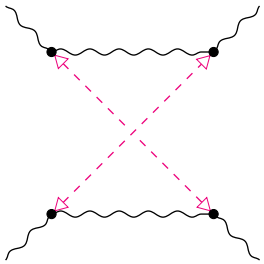

Top/bottom: scalar polarization

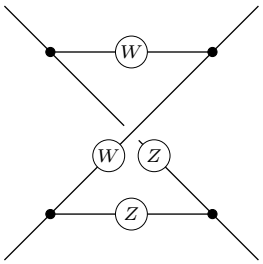

Independent styling and endpoint metadata

Only the feature named in each example is added. Index-position polish remains D01.

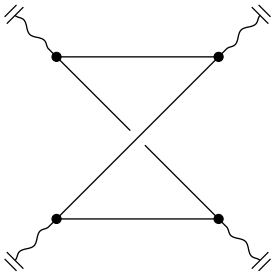

Top/bottom: mixed EW / pink Proca

Top/bottom: explicit species circles

Top/bottom: outer double caps

Top/bottom: endpoint indices
