Box: crossed upper external pair

The square loop is unchanged. The upper crossing has no interaction vertex.

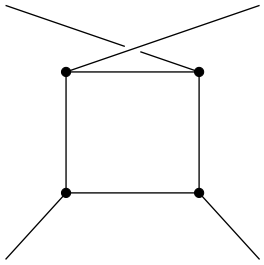

Default upper routing

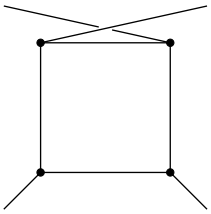

Larger crossing gap

Explicit rectangular loop

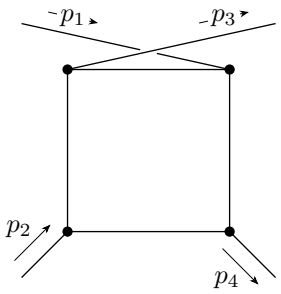

Smaller diagram

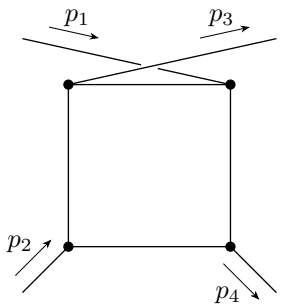

Logical flow follows the outer slots

Slot 1 enters from UL and meets TR; slot 3 leaves TL toward UR.

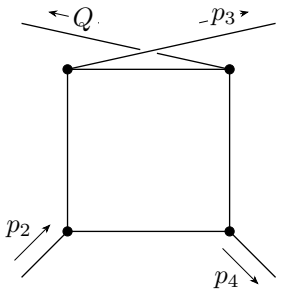

Measured label gaps

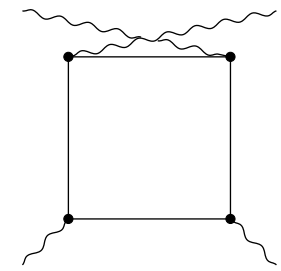

Continuous upper arrows

Independent upper label / reversed flow

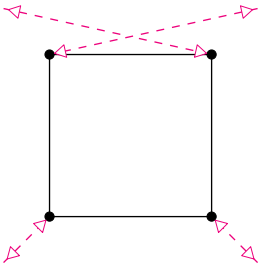

Wavy external lines

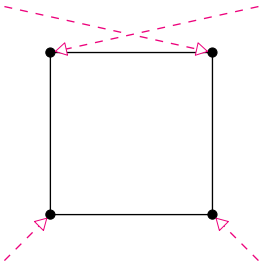

Endpoint markers: no tips at the cut

Pink Proca has two tips per leg; scalar polarization has its existing one-tip convention.

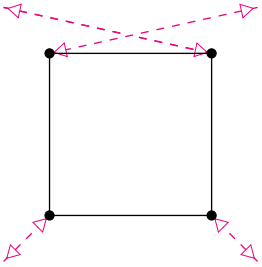

Proca external legs

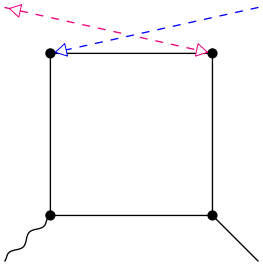

Scalar polarized external legs

Legacy radius override: Proca

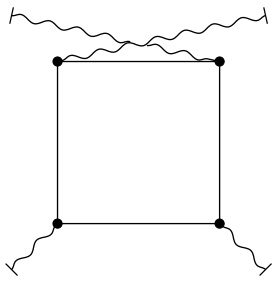

Mixed logical styles

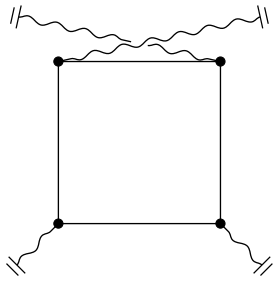

Caps, species circles and endpoint metadata

Each cell adds only its named feature. Index-position polish remains deferred as D01.

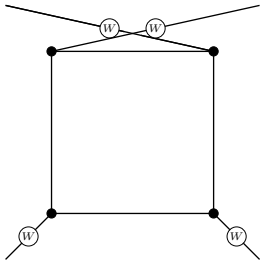

Single outer caps

Double outer caps

One scaled species circle per leg

Endpoint index ownership
