

# Correlator Diagram Examples

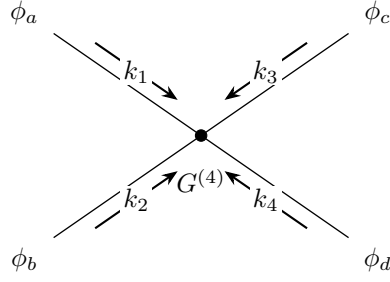

Default 2-point correlator:

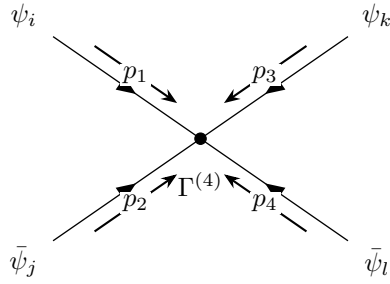

2-point correlator with  $q_i$  labels and Lorentz indices:

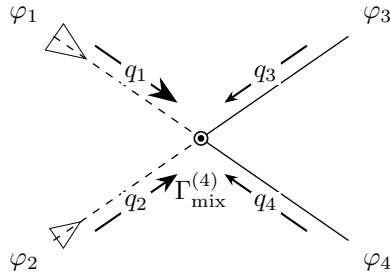

4-point correlator with  $k_i$  labels:

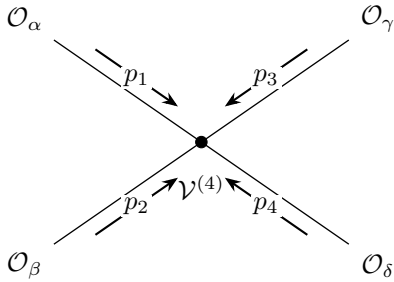

4-point correlator with fermion lines and custom external labels:

4-point correlator with a visible center vertex, emphasized arrows, and scalar-polarized legs:

Vertex-style 4-point object with upper indices and no blob:

Sunset self-energy diagram:
